

What is PSYCHOLOGY?

A. ⇒ **PSYCHOLOGY** → Ψ (symbol).

Study of mind & behaviour.

Science studying the mental processes & experiences.

⇒ **STUDY** → mental process (cognition).
→ Experience.
→ Behavioural context.
→ Cultural context.

- Mental Process - Thinking, cognition.
- Experience - They are subjective & depends individually.
- Behaviour - Covert & Overt actions / responses.
- Cultural context - External factors affecting in the Ψ of people.

⇒ **PSYCHOLOGY**:-

Latin words → **PSYCHE** / **PSYCHE** + **LOGOS** = Ψ .
(Soul) (Science / logic)

⇒ **Ψ as a discipline / stream:-**

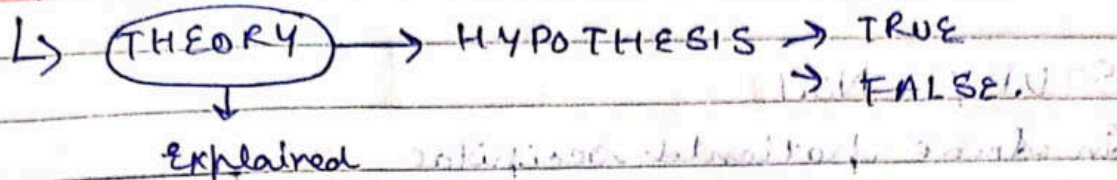

- **NATURAL SCIENCE** - Study of use of methodology.
Study of use of physical & biological processes / sciences.
(Data collected with controlled conditions).
- **SOCIAL SCIENCE** - Study the past experience & see the results & then use them for further outcomes.
Social & Cultural sciences.
(Data collected with natural conditions).

⇒ **NATURAL SCIENCE** & **SOCIAL SCIENCE**

- | | |
|--|---|
| 1.) Data collected in controlled conditions. | 1.) Data collected in natural conditions. |
| 2.) Study of the physical & biological sciences. | 2.) Study of the social & cultural sciences. |
| 3.) Study cause & effect relationship. | 3.) Study interaction between person & its social-cultural environment. |
| 4.) Scientific views. | 4.) Subjective views. |

*

⑥ ⇒ Understanding MIND & BEHAVIOUR:-

- * MIND cannot exist without BRAIN but mind is a separate entity / thing.
- Brain - Physical / tangible thing.
- Mind - No structure.

→ STUDY NO.1

In some patients occipital lobes were removed in brain surgery.

↓

Responded correctly to location & configuration of visual cues.

Even if the brain is damaged or modified, the mind is working.

→ STUDY NO.2

An athlete lost his arm in an accident.

↓

Continued to feel his arm & its movements (Phantom arm).

↳ meaning: not visible / ghost

Mind still working & doing as it was before.

→ STUDY NO.3

A young man with brain injury after returning from the hospital.

↓

Claimed that his parents have been replaced by duplicates.

Brain not working, but mind is working and can familiarize.

Date: / / 4

Page No: _____

- Studies tell / show that even when the brain is damaged the mind works & sends the signal.

⇒ Activities of mind captured through :-

- FMRI :- Functional Magnetic Resonance Imaging.
- EEG :- Electro-Encephalo-gram.

Capture the brain working & see on the computers.

⇒ Mind & Behaviour are related? ⇒ Shown in Recent studies

- Positive Visualisation - (Feeling positive) (Eg- Blocked arterial patient).

One can bring out significant changes in bodily processes.

- Mental Imagery - Technique → Images are generated by a person in the mind, have been used to cure phobias/fears.

- Good effect on the body → by good feeling in the mind's working.

- * Psycho-neuro-immunology. (Technique).

In this technique, it emphasises the role played by the mind in strengthening the immune system.
(Believe you are curing).

C: POPULAR NOTIONS ABOUT THE DISCIPLINE OF PSYCHOLOGY.

- Push people to make them perform better or motivate them.

• Common sense

↓
Based on
HIND SIGHT

(opposite of
psychology)

means → understanding
any situation after it
has happened.

↓
It can only
explain not
predict.

Eg:- A friend leaves you

↓
(Common sense)

↓
Forget &
move on.

↓
Keep it
remembering.

- PSYCHOLOGY:- Scientific knowledge

ψ looks for patterns of behaviour
which can be predicted & not explained
after it occurs.

→ MYTHS:-

- 1.) ψ can control your mind.
- 2.) ψgists can read minds.
- 3.) ψgists are mad people.
- 4.) ψgists are same as psychiatrist.

⇒ DWECK (1975) ⇒ Study on children who give up too easily. Objective was to increase their confidence.

GROUP (A)

GROUP (B)

Easy problems

Easy +

Difficult

Trained for

25 days to

solve maths

problems.

↓
Able to solve

↓
Able to
solve only
easy ones.

(Confidence
increased)

(Decrease motivated
irregularly)

GROUP (A)

GROUP (B)

gave up
easily when

couldn't solve

difficult problems.

(Over confidence).

Kept trying
to solve

(motivated)

New set of
ques. to both

the groups

with easy

& difficult

problems.

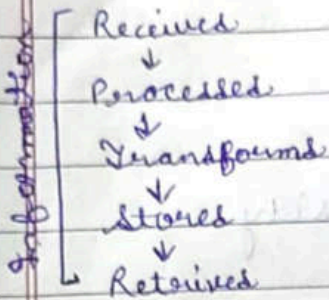

D.

EVOLUTION OF PSYCHOLOGY :-

- Ancient Philosophy = Roots → Aristotle, Socrates.
- 1879 • Structuralism - First Lab in Leipzig by Wilhelm Wundt.
Study conscious experiences by asking the client.
↳ Introspection → Psychists = Structuralists.
- 1890 • Functionalism - Lab in America, Cambridge by William James.
What mind does & how behaviour functions.
↳ Functionalists. (John Dewey → people adapt environment)
- 1900 • Psycho Analysis by Sigmund Freud.
Human beings are motivated by unconscious desire for gratification of pleasure / desire.
↳ Psychoanalysts.
- 1905 • Intelligence Tests → By Alfred Binet & Simon.
- 1906 • 1st Psych Dept. in Calcutta University.
- 1912 • Gestalt Psych → By Wertheimer, Koffka, Kohler.
Experience as holistic.
↳ Gestaltists.
- 1924 • Behaviourism → By J. Watson & Skinner.
Psych is the study of behaviour or responses to the stimulus.
↳ Behaviourists.
- 1951 • Humanistic Approach → By Maslow & Rogers.
Behaviour is determined by environment conditions.
↳ Existentialists / Humanists.
- 1953 • B.F. Skinner's Book → "Science & Human Behaviour."
- 1954 • Maslow → "Motivation & Personality."
- 1955 • NIMHANS est. in Bangalore.
National Institute of Mental Health & Neuro-Sciences.
- Later • Structuralism + Gestalt = COGNITIVE perspective.
↳ Constructivists.

→ Cognitive Perspective (1.3)

- How we know about the world. (Thinking, understanding, perceiving, memorising, problem solving, decision making).
- Brain processes like a computer.

Mind also keeps constructing and exploring physical & social world.

↳ CONSTRUCTIVISM

↓
Piaget
↓

Children actively
construct their
mind.

↓
Vygotsky
↓

Children need
to interact with
adults.

SCHOOLS

- ↳ Structuralists → STRUCTURALISM.
- ↳ Functionalists → FUNCTIONALISM.
- ↳ Gestaltists → GESTALTIANISM / GESTALT.
- ↳ Behaviourists → BEHAVIOURISM.
- ↳ Psychoanalysts → PSYCHO-ANALYSIS.
- ↳ Humanists → HUMANISTICISM.
- ↳ Cognitivists → COGNITIVE PERSPECTIVE.

⇒ EVOLUTION OF Ψ :- SCHOOLS School of THOUGHT

1.) STRUCTURALISM :-

- Study of structure of mind.
- By Wilhelm Wundt.

2.) FUNCTIONALISM :-

- Study of functions of mind.
- By William James.

3.) GESTALT :-

- Study of a whole (i.e. more observable).
- By Wertheimer, Koffka, Kohler.

4.) BEHAVIOURISM :-

- Study the behaviour with scientific method.
- By Watson.

5.) PSYCHOANALYSIS :-

- Study of the unconsciousness.
- By Sigmund Freud.

6.) HUMANISTIC APPROACH :-

- Study of the individual / uniqueness.
- By Abraham Maslow & Carl Rogers.

7.) COGNITIVE PSYCHOLOGY :-

- Study of mental processes.
- By Piaget & Vygotsky.

SARAA

(E.)

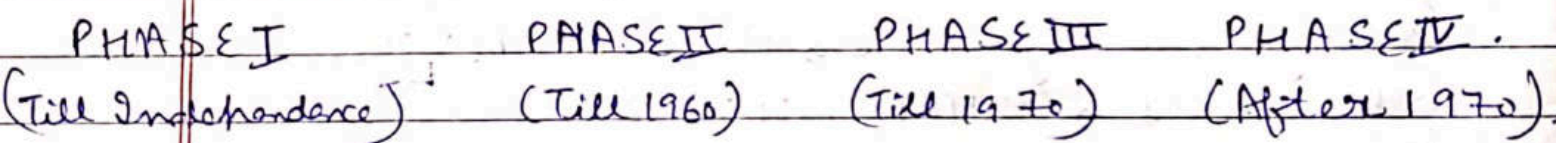

DEVELOPMENT OF Ψ in India

(Continued to be developed by the Western Philosophy).

- Development of Dept. of philosophy at Calcutta University.
- First Ψ Lab established in 1916.
- First Ψ al Dept. 1916.
- for experimental Ψ → Calcutta University.
- Another Dept. of applied Ψ in 1938.
- Dr. N. Sen Gupta → Father of Ψ in India.
- Study on experimental Ψ .
- Prof. Bose in 1922 → established Indian Psychoanalytic Association (IPA) (followed Freud).
- Dept. of Ψ in University of Mysore & Patna.
- Two Centres supported by UGC.
 - ↳ Utkal University (Bhubaneswar).
 - ↳ University of Allahabad).
- Total 70 universities offer courses.
- Acc. to Durganand Sinha's Book,
" Ψ in a 3rd world country".

The Indian Experience

Published in 1986.

BRANCHES / SCOPE :-

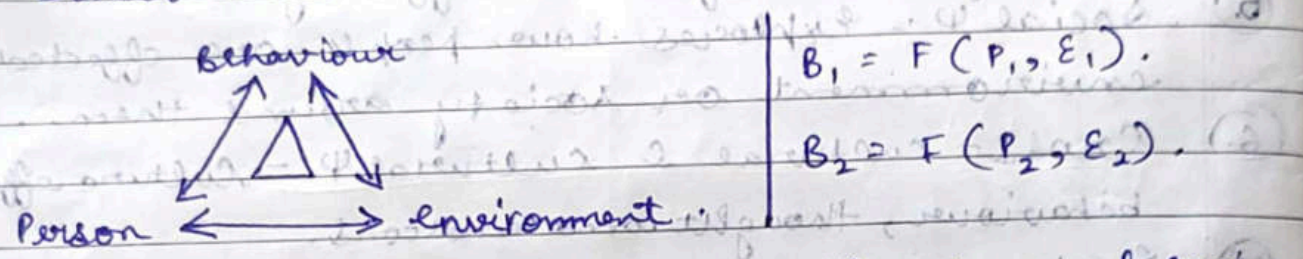

- ① Cognitive Ψ :- Mental processes involved in acquisition, storage, manipulation and transformation of information received from the environment.
- ② Biological Ψ :- Focus on behaviour & physical system. Physical aspects effects the Ψ .
- ③ Neuro Ψ :- Study of mental Ψ . (MRI & CTI SCAN). Study the mind-brain working.
- ④ Developmental Ψ :- Study of growth across the ages and factors effecting it.
- ⑤ Social Ψ :- Explores how people are effected by their environment or society around them.
- ⑥ Cross-cultural & cultural Ψ :- Culture effects the behaviour, thought and emotions.
- ⑦ Environment Ψ :- Human interaction & environment conditions around are studied. eg:- Humidity effecting.
- ⑧ Health Ψ :- Deals with the health branch. How to deal with the patient with good care.
- ⑨ Clinical Ψ :- Study & diagnose of disorder(s) and maladaptive behaviour. (In clinical setting).
- ⑩ Counselling :- An interaction of client with the therapist to solve the problems by using various techniques of Ψ .
- ⑪ Industrial and Organizational Ψ :- Ψ used in the organization / work setting to manage the satisfaction levels, relationships, working, etc.
- ⑫ Educational Ψ :- Ψ studying in the educational area & helps in the benefits, policies, system, patterns, etc.
- ⑬ Sports Ψ :- Motivation, encouragement to the sports players.

(G) ⇒

THEMES OF RESEARCH & APPLICATIONS

(1) THEME 1.
 Ψ like other science attempt to develop principles of behaviour & mental processes.

(2) THEME 2.
 $B = F(P, E)$
 Behaviour = Function (Person, Environment).

Behaviour is based on function of a person & envt.

(3) THEME 3.
 Human behaviour is caused.) effect
 Behaviour has reason / reasons.

(4) THEME 4.
 Human behaviour is culturally constructed.
 (Eg) THUMB'S UP
 ↓ ↓
 Western Indian
 (Best of luck) ⊕ (Thanga) ⊕

(5) THEME 5.
 Human behaviour can be controlled & modified through the application of psychology.
 Maladaptive Behaviour → changed → By Ψal methods.

(H) → ψ & other disciplines:-

- 1.) Philosophy:-
Roots of ψ; nature of mind, motivation, emotions were the concerns of philosophers → method of knowing → ψ.
- 2.) Medicine:-
Healthy body = healthy mind; ψists help in coping up, provide care units to the patients of cancer, AIDS, etc.
- 3.) Economics, Pol. Sc., Sociology:-
Eco → Consumer behaviour; Pol. Sc. → Conflicts, solutions; Socio → Individual & society behaviour; socialization, conflicts.
- 4.) Computer Science:-
Comp. Sc. = mimic human mind; structure & organised memory like the humans.
- 5.) Law & Criminology:-
ψ in answering the questions; body lang., tone, signs of guilt, falsehood; understanding the situation.
- 6.) Mass Communication:-
Print media influences the thinking, attitudes & emotions. Strategies for better/effective comm; know readers interests.
- 7.) Music & Arts:-
Music Therapy; Ragas for curing physical ailments. Use of music in work performance.
- 8.) Architecture & Engineering:-
Mental & physical space; satisfy aesthetically; better locations/for placements for mental health.

(I) → PSYCHOLOGISTS AT WORK :- TYPES.

- 1.) Clinical
- 2.) Counselling
- 3.) Community
- 4.) School
- 5.) ~~SARAF~~ Organisational
